IOWA STATE UNIVERSITY

CYCLONE AERO DESIGN

2026–2027 Corporate Partnership Packet

SAE Aero Design | Ames, Iowa

Design · Build · Test · Compete

2026 – 2027 Team Leads

ABOUT US

The only club at Iowa State building competition aircraft.

As the only club at Iowa State with **direct experience in aircraft design**, our main goal is to recruit students across **all disciplines** and class levels to engage them in aerospace.

This year, we will be designing and building **two planes for competition** and bringing twice as many people. This aligns with our goal of advancing the club, ensuring there are **opportunities for new members** to get involved.

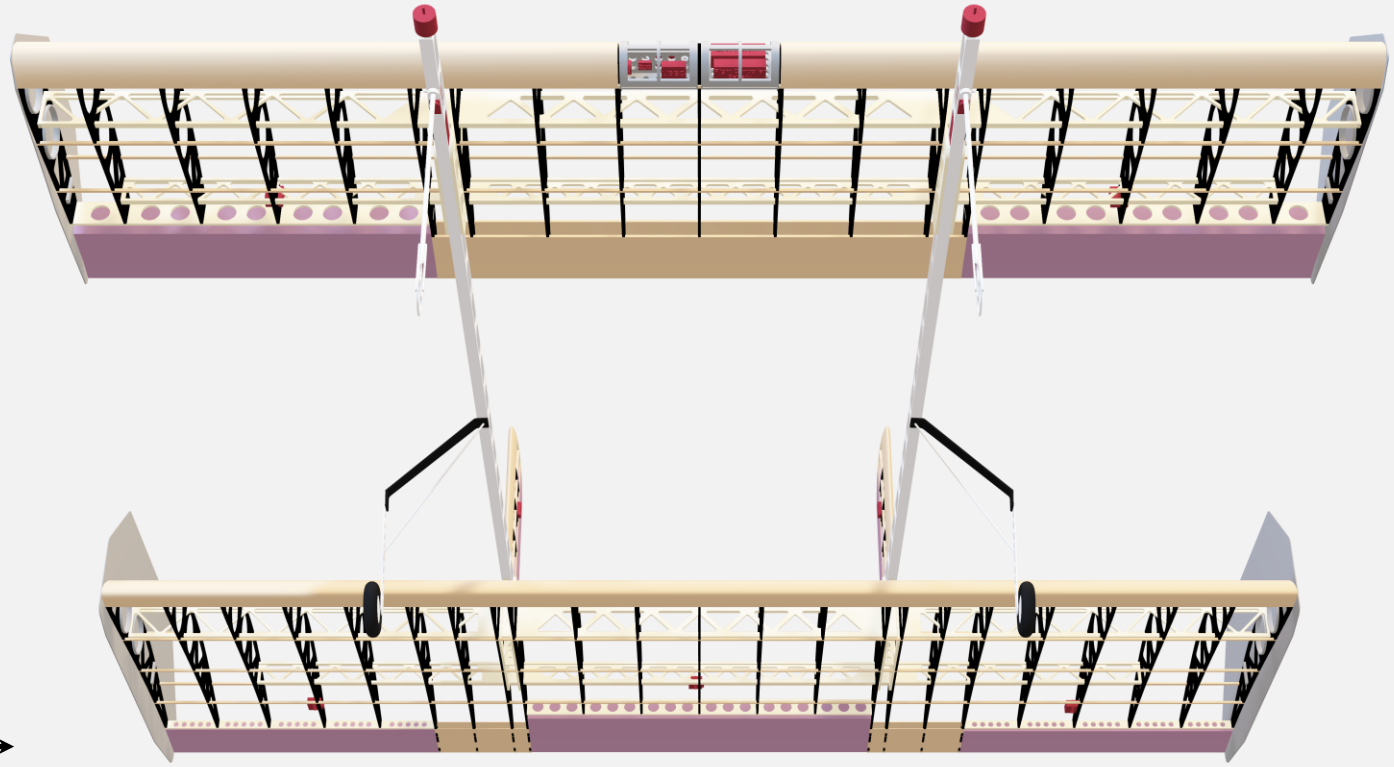

Engineering aircraft. Developing engineers.

SAE Aero Design challenges collegiate teams to **design, build, document, present, and fly** aircraft that meet mission requirements and technical expectations.

1
International Competition

Leadership Positions

SPONSOR VALUE

Why Cyclone Aero Design matters

Companies support more than a student project. They help build a **talent pipeline** through hands-on engineering, competition, and leadership experiences.

Recruit

Connect with technically motivated Iowa State students.

Engage

Host workshops, design reviews, and technical conversations.

Build visibility

Earn exposure through aircraft branding, campus, media, and competition.

2026–2027 CHALLENGE

Two aircraft.
Two classes.
One engineering program.

This season expands Cyclone Aero Design into both **Regular Class** and **Micro Class.**

REGULAR CLASS

Heavy-lift aircraft optimized to carry the maximum number of weighted 2-liter bottles.

MICRO CLASS

Compact aircraft optimized to carry heavy internal payload while overcoming externally mounted drag articles.

WHAT THIS MEANS FOR OUR TEAM

- More design work. → Two Aircraft, **Two Design Cycles**
- More leadership. → **Dedicated Leads** for Each Subteam
- More manufacturing. → More Parts **Built In-House**
- More testing. → More **Prototyping & Flight Testing**
- More opportunities for sponsor support. → **Measurable** Sponsor Impact

TEAM ORGANIZATION

Six disciplines. One aircraft.

Each sub team owns a critical part of the design-build-test cycle, **giving sponsors direct visibility into the engineering work** behind the aircraft.

DESIGN → BUILD → TEST → COMPETE

A clean structure lets new members contribute quickly while **giving experienced leads ownership** over aircraft systems, testing, and sponsor-facing work.

SUBTEAMS

01
AERODYNAMICS
Design - Stability - Performance

02
STRUCTURES
Loads - Interfaces - Producibility

03
MANUFACTURING
Tooling - Fabrication - Assembly

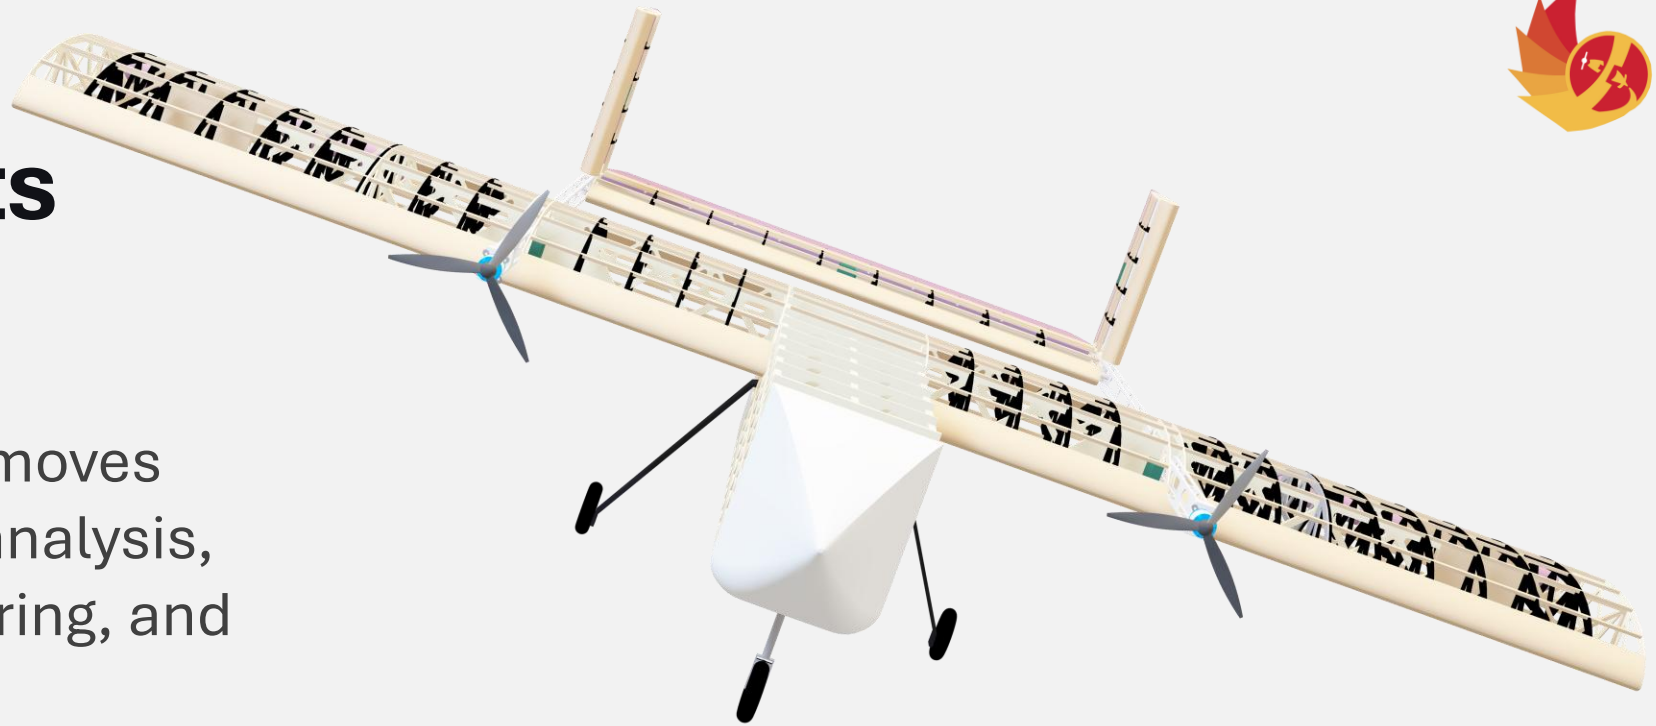

04
ELECTRICAL
Power - Avionics – Flight Systems

05
MARKETING
Sponsors - Media - Outreach

06
PROGRAMMING
Simulation - Calculators - Data

ENGINEERING WORKFLOW

From requirements to competition

A **sponsor-backed** season moves through structured design, analysis, physical testing, manufacturing, and flight validation.

SUMMER

1. **Requirements**
2. **Design and CFD**
3. **CAD and FEA**

FALL

1. **Systems Testing**
2. **Flight Test**
3. **Team Recruitment**

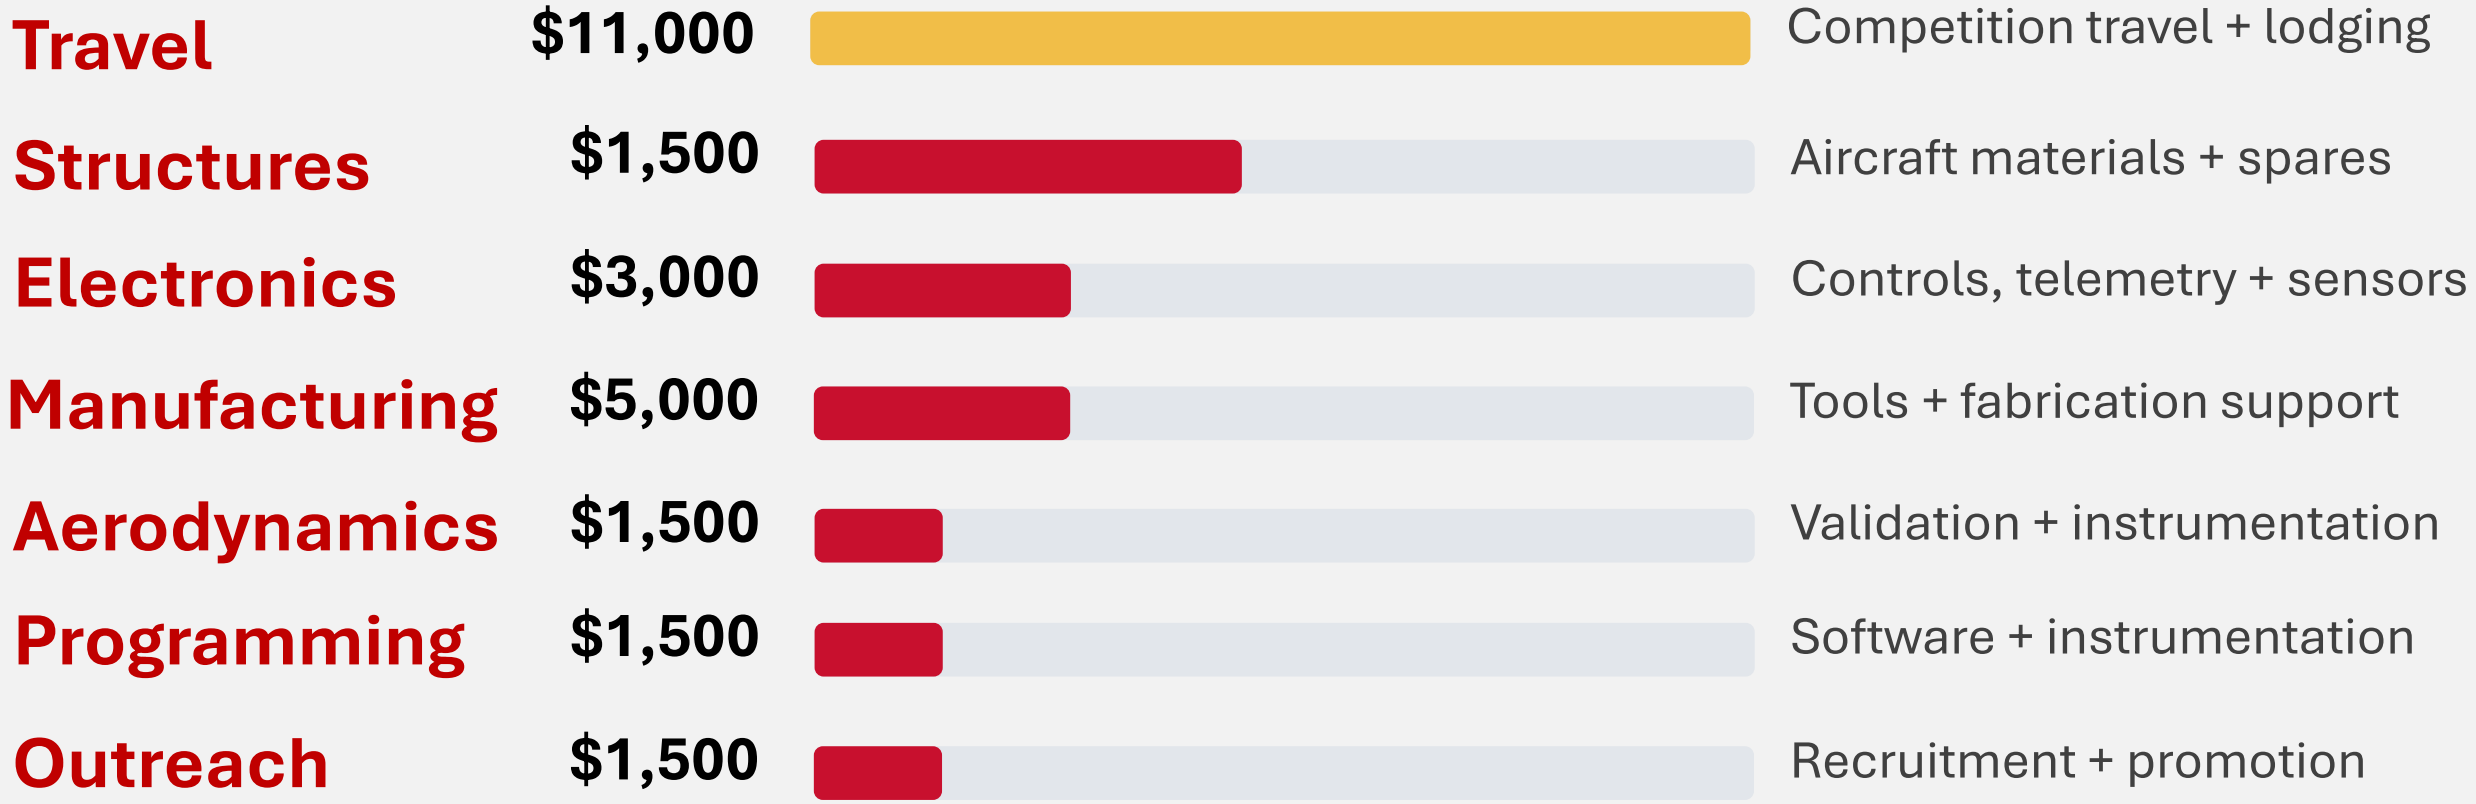

SPRING

1. **Final Manufacturing**
2. **Flight Readiness Testing**
3. **Competition**

WHERE SPONSORSHIP GOES

$25,000 total project need

Funding supports the **engineering**, **manufacturing**, **testing**, **travel**, and **student participation** required to compete.

PARTNERSHIP IN ACTION

Support becomes flight hardware.

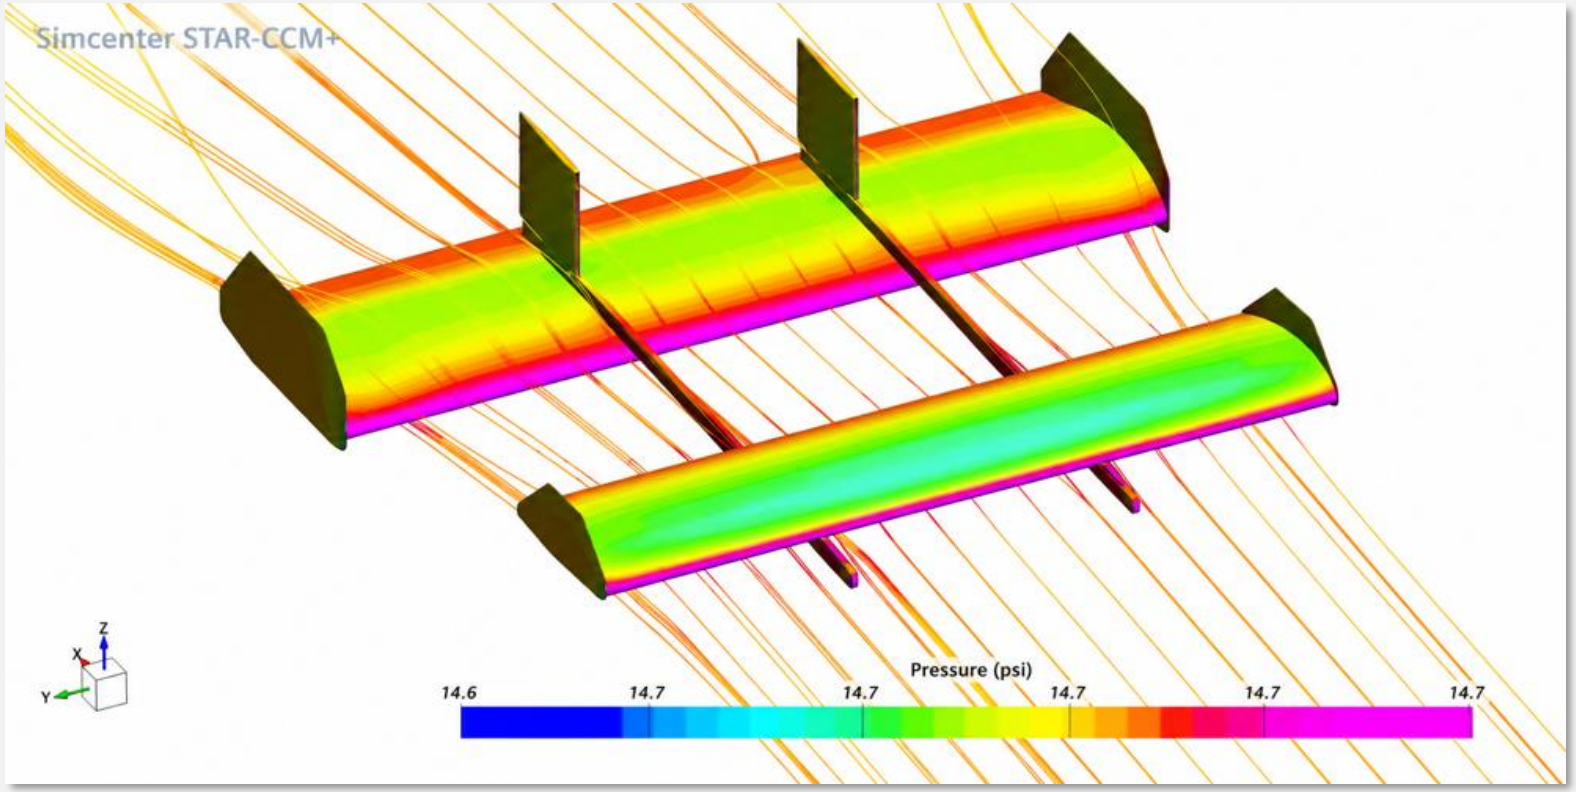

Support can take many forms: funding, materials, manufacturing, software, equipment, mentorship, connections, and technical expertise. This all **fuels the technical conversations with our members** at career fairs and interviews.

Software

Materials

Avionics

Student Development

Partnership levels

Higher tiers **include previous opportunities**.
Cardinal is the flagship partnership level.

BRONZE

$250+

- Logo + website recognition
- Promotional materials shared at team events
- Recognition as an Aero SAE supporter

SILVER

$1000+

- Enhanced logo and promotional recognition
- Recognition at meetings and external events
- Access to **student recruiting and networking**

RECOGNITION + ACCESS

Partnership levels

Higher tiers **include previous opportunities**.
Cardinal is the flagship partnership level.

Gold

$2,500+

- Invitations to design reviews and technical discussions
- Opportunities to host workshops, information sessions, or technical presentations
- Regular aircraft and team **progress updates**

CARDINAL

$5,000+

- Priority branding on the aircraft and major team materials
- Direct engagement with team leadership and technical sub teams
- Dedicated company spotlights and promotional features
- **Priority access** to all previous opportunities

START A RELATIONSHIP

How to give. Online or Check

Begin at the sponsorship website.

The site keeps the current donation link, check mailing instructions, sponsorship levels, tax note, and team contacts in one place.

SCAN or CLICK TO SPONSOR

Sponsorship Website

01

Give Online

Access Sponsorship website via link or QR

On the Sponsorship page:

Access the Iowa State Foundations link and follow the instructions to donate.

We also accept custom donations – see website for more info.

02

Give by Check

Checks payable to:

Iowa State University Aero SAE

Use the website for the current mailing address and contact details before sending a check.

Include company name, contact email, intended sponsorship level, and any partnership notes.

501(c)(3) Giving Note

Qualifying gifts are processed through the Iowa State University Foundation. Sponsor benefits may affect the deductible portion of a contribution.

WHY COMPANIES PARTNER WITH US

More than a logo on an airplane.

RECRUIT

Meet **technically motivated** Iowa State engineering students.

ENGAGE

Participate in **design reviews, workshops,** and **team discussions**.

BUILD AWARENESS

Showcase your company through competition, media, and branding.

DEVELOP

Support practical hands-on engineering education.

2026 – 2027 Leads and Sub-Leads

PARTNER WITH US

Engineer what flies next.
